

ZHEN WANG

PRODUCT DESIGNER

Lead Product Designer who ships the production front-end (TypeScript/React) for AI-native developer and enterprise tools. ~10 years making dense, expert software legible — validating decisions in working code, not just mockups. CS / engineering background; AI-assisted design workflow.

SKILLS

Building: Production front-end (TypeScript/React, HTML/CSS/JS) · code-based prototyping to validate decisions in working software

AI: Designing AI-native products (conversational / agentic UI) · AI-assisted workflow with Claude Code

Design: UI & visual design · Figma systems & libraries · interaction & user flows

Research: usability testing · data analysis · heuristic & competitive analysis · workshops

EXPERIENCE

Tripalink · Lead Product Designer

JULY 2023 – PRESENT

- Lead end-to-end design for **UnitPulse**, Tripalink's AI-native leasing platform — the full renter journey from engagement and touring to application and move-in. Redesigned the agent leasing console so each agent can manage **250+ leads/month**, a sustained **20% YoY** efficiency gain.
- Helped drive the convergence of three separate products into one platform (one login, one design language, with a conversational Copilot as the command layer) as design lead — shaping how the Copilot surfaces its reasoning, asks before acting, and hands off to a human mid-task.
- Integrated AI across leasing and marketing, cutting manual work **40%** while lifting tour-to-lease conversion **+16%**.
- Grew the consumer site **+28% YoY** in monthly active users through AI-powered search, optimized listings, and a referral program.
- Manage and mentor the design team; partner with engineering and operations on delivery.

Twilio · Product Designer

JUNE 2021 – FEBRUARY 2023

- Redesigned the Buy-a-Number page for regional number purchase as part of the Regional Onboarding initiative, lifting page impressions **+179%**.
- Ran a mental-model study (**34 participants**, **17K+ accounts** analyzed) and drove removal of the Default Region feature by aligning cross-functional stakeholders, reducing cross-product confusion.
- Initiated and documented Twilio's Global Design Guidelines — a scalable design system and library for brand and UX consistency.

Tasktop · Senior UX Designer

JULY 2016 – JUNE 2021

- Led product design for enterprise software connecting DevOps tools, making the value stream visible and measurable for Fortune 500 customers.
- Partnered directly with the CEO to take a new Flow Framework™ product (featured in the book *Project to Product*) from 0 to 1, securing a **\$2M enterprise deal** within a year.
- Contributed front-end development (TypeScript, HTML/CSS/JS) alongside design, carrying interaction and edge-case decisions into shipped code.

EDUCATION

The University of Texas at Austin · MS, Information Studies (UX)

MAY 2016 · GPA 4.0 / 4.0

University of Nebraska–Lincoln · BS, Computer Engineering

MAY 2014 · GPA 3.8 / 4.0
